

82-4331

6 March 1982

MEMORANDUM FOR: Executive Director
Deputy Director for Operations
Deputy Director for Intelligence

FROM: Director of Central Intelligence

SUBJECT: Global Nuclear Inspections

1. The conclusion of the Nuclear Regulatory Commission that inspection alone can not reliably warn of diversion of reprocessed or highly enriched fuel for use in atomic weapons, although not a new discovery, will alarm a great many people and arouse concern whether our coverage of these activities is as good as it can be.

2. Can we organize a review of our collection capabilities on this target to see how adequate they are and what methods there are of enhancement.
